# Fraser Health Hackathon

## What is a Hackathon?

A hackathon is an event where people involved in computer programming work collaboratively together, often in teams, in a sprint-like race to develop programs around a certain topic or theme.

## What kind of solutions can we see from a hackathon?

Solutions might come in the form of apps that connect patients to services or support systems, heat maps that identify clusters of illnesses, predictive algorithms in population health trends, automated checklists, workflow tools, and many other possibilities

# Fraser Health Hackathon

Purpose:

To find Technology driven  
solutions to nine challenges

# Fraser Health Hackathon

January 21-22, 2017

## THE 9 CHALLENGES

### **PATIENT CENTERED**

1

Create a tool that helps the public navigate the health care system.

2

### **DECISION MAKING**

Produce systems that reveal usable insights from available data.

### **CLINICIAN COLLABORATION**

3

Develop tools that make workflows more efficient.

4

### **FRONTLINE ENGAGEMENT**

Develop strategies that allow health care providers to communicate and collaborate more effectively.

### **SPECIALIST E-SCHEDULING**

5

Create a tool to coordinate referral scheduling in a robust and transparent manner.

6

### **TAKE-HOME NALOXONE**

Create an app that provides Naloxone kit users with emergency response support

### **OVERDOSE ANALYTICS**

7

Produce an application that produces a database and visual map of overdoses, including real-time and historical.

8

### **MENTAL HEALTH SUBSTANCE USE**

Produce an application that connects people to mental health and addictions resources and support.

9

### **WILD CARD**

If you have a great idea that can help our health care system, we want to see it!

## Participant Agreement

fraserhealth

Better health.  
Best in health care.

### Fraser Health Hackathon PARTICIPATION AGREEMENT

Fraser Health Authority ("Fraser Health") is pleased to present the Fraser Health Hackathon (the "Hackathon") hosted at the Simon Fraser University Surrey Campus on January 21-22, 2017.

The Hackathon is an opportunity to work creatively in teams on health care challenges and themes with the assistance of mentors from Fraser Health Authority, Simon Fraser University, Surrey Innovation Boulevard, City of Surrey, and Community Logiq, as well as other local entrepreneurs. Participants will have the opportunity to create and submit works (each submitted work an "Entry") that have the potential to provide solutions relevant to Fraser Health and the health care industry in general.

The Hackathon is governed by this Fraser Health Hackathon Participation Agreement (the "Agreement"). **By participating in the Hackathon, you ("you" or the "Participant") agree to be bound by the terms of this Agreement, the decisions of Fraser Health (and its Hackathon judges) in relation to this Hackathon, and all applicable laws.**

#### 1. PARTICIPATION

## Agenda

### Fraser Health Hackathon Agenda

Day 1 – Saturday January 21, 2017		
8:00 am–9:00 am	Day 1 Morning Networking	
9:00 am–10:00 am	Registration	Top of stairs on mezzanine level at SFU
10:00 am–10:10 am	Welcome by Master of Ceremonies: • Gillian Vrooman, President, Open Data Society of BC	Theatre
10:10 am–10:30 am	Welcome and Keynotespeakers: • Dr. Norbert Haunerland, Professor of Biological Sciences and Associate Vice President of Research, SFU • Michael Marchbank, President & CEO, Fraser Health	Theatre
10:30 am–11:00 am	Hackathon Overview by Gillian Vrooman: • Challenge Overview • Participant rules • Awards/Prizes	Theatre
11:00 am–12:00 pm	Idea pitching and Team formation Breakout rooms assigned	Theatre
12:00 pm–1:00 pm	Lunch and Networking	Breakout rooms 1 & 2
1:00 pm–1:30 pm	Team Introductions and final Team formation	Theatre
1:30 pm–5:30 pm	Hack Away	Breakout rooms 1, 2 & Theatre
5:30 pm–6:00 pm	Dinner	Breakout rooms 1 & 2
6:00 pm–7:00 pm	Team Check-in and Progress updates	Theatre
7:00 pm	Dismiss and Cleanup (Day Close)	Breakout rooms 1, 2 & Theatre

### Fraser Health Hackathon Agenda

Day 2 – Sunday January 22, 2017		
9:00 am–10:00 am	Day 2 Morning Networking	
10:00 am–10:30 am	Welcome and review of Agenda for the day	Theatre
10:30 am–2:00 pm	Hack away Online entry submissions due at 2:00pm	Breakout rooms 1, 2 & Theatre
Note: Lunch will be available at 12:00 pm in Break out rooms 1 & 2		
2:10 pm – 4:00pm	Team presentations to Judges: • Dr. Victoria Lee, Vice President, Population Health and Chief Medical Health Officer, Fraser Health • Philip Barker, Vice President, Planning, Informatics and Analytics, Fraser Health • Peter Payne, President & CEO Health Tech Innovation Foundation • Dr. Daniel Schwarz, Program Medical Director, Renal Program, Fraser Health • Arvinder Sing Kang, Co-founder & CTO, UrbanLogiq	Theatre
4:00 pm – 4:30 pm	Judges deliberate Keynote Speaker: • Rob Peets, Director, Investment Analysis for Telus Ventures	Theatre
4:30 pm – 5:00 pm	Closing Ceremonies and Awards Presentation Presenters: • Linda Hepner, Mayor City of Surrey • Rob Peets, Telus Ventures • Victoria Lee & Philip Barker, Fraser Health	Theatre
5:00 pm – 6:00 pm	Feedback forms distributed, filled out and collected Dismissal and clean up Event Close

## Team Presentations

**Ambulink:** Ambulink - a mobile toolkit and communication system for ambulance crews; Patient centered/guided support tools and workflows to assist paramedics **X-Factor**

# Fraser Health Hackathon

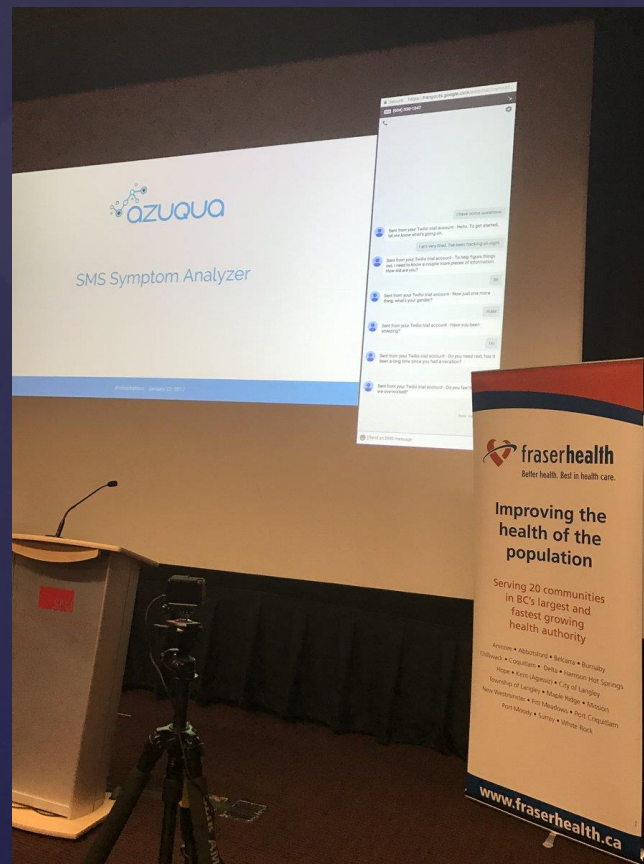

**First Responders: Opioid Overdose Alert System (OOAS)** - Mobile app for person first on scene to press RED button - report overdose. Notification sent to 1 KM radius, responders press GREEN button - geolocation map shows overdose location and responders;

Identifies areas with high overdose rates and allows a user to trigger a response from someone in the immediate area who can administer Naloxone quickly, increasing the chance of survival after an overdose occurs. **Naloxone App**

# Fraser Health Hackathon

**Azuqua: SMS Symptom Analyzer** – Enables anyone with a cell phone to initiate a text conversation around symptoms. The service asks questions based on probability of a particular condition and offers a nearby location for follow-up. **Patient Centered Service**

# Fraser Health Hackathon

**Care Crew:** **Care Crew** - Simple Digital Personal Health Record for Seniors Care; developed for families to help support seniors aging at home. It centralizes medication lists, dietary restrictions, symptom tracking and other health information so seniors and their families can easily share information with health care providers and all those involved in the senior's care.

**X-Factor**

# Fraser Health Hackathon

**Panic Button:** **Biocalm** - biofeedback anxiety app; An app that walks through techniques to manage anxiety attack using biofeedback **Mental Health & Substance Use**

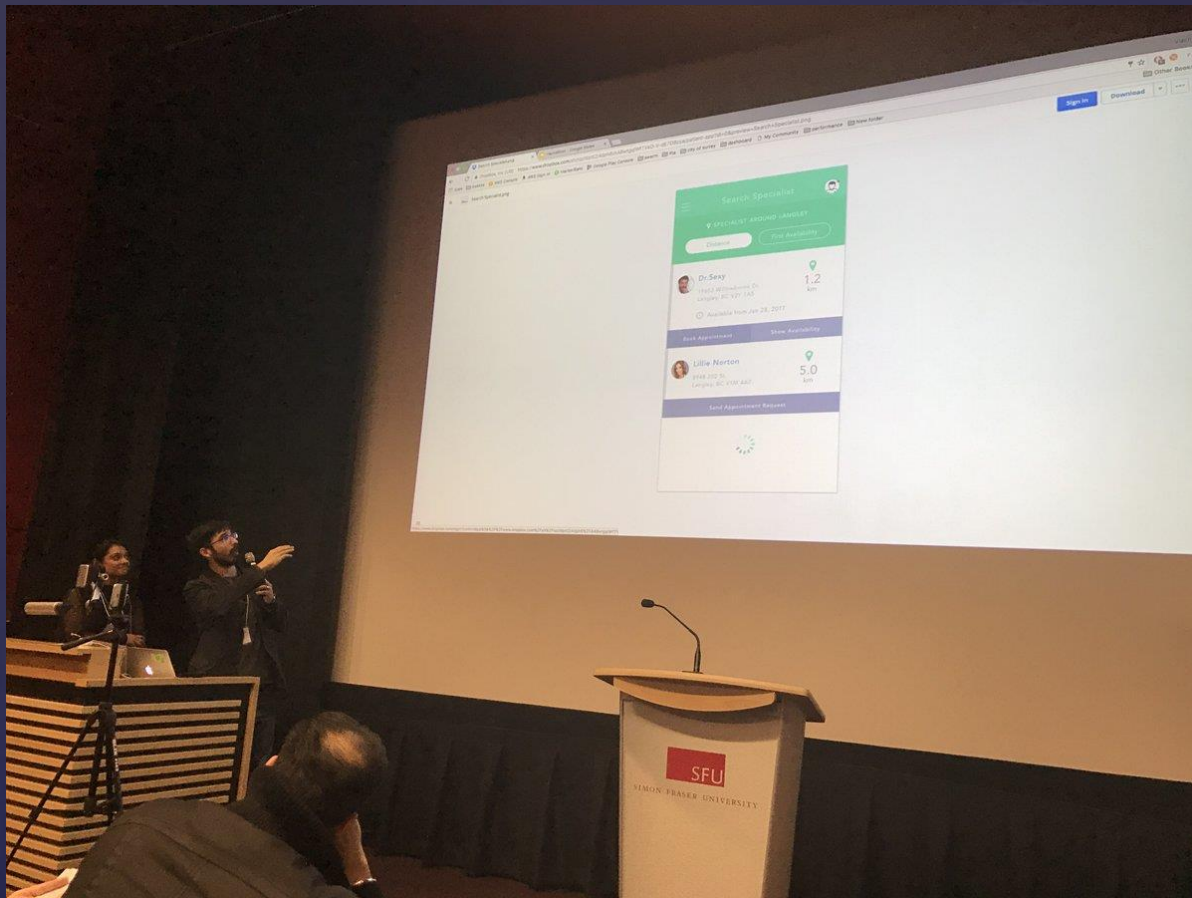

# Fraser Health Hackathon

**DI Scheduler:** **DI Scheduler** – e-scheduling app to automate appointments with patient and doctor notifications **e-scheduling of specialist resources**

# Fraser Health Hackathon

**Makkke:** MedicalMatch- Centralized Referral System, e-scheduling app for specialists; e-scheduling of Specialists Resources.

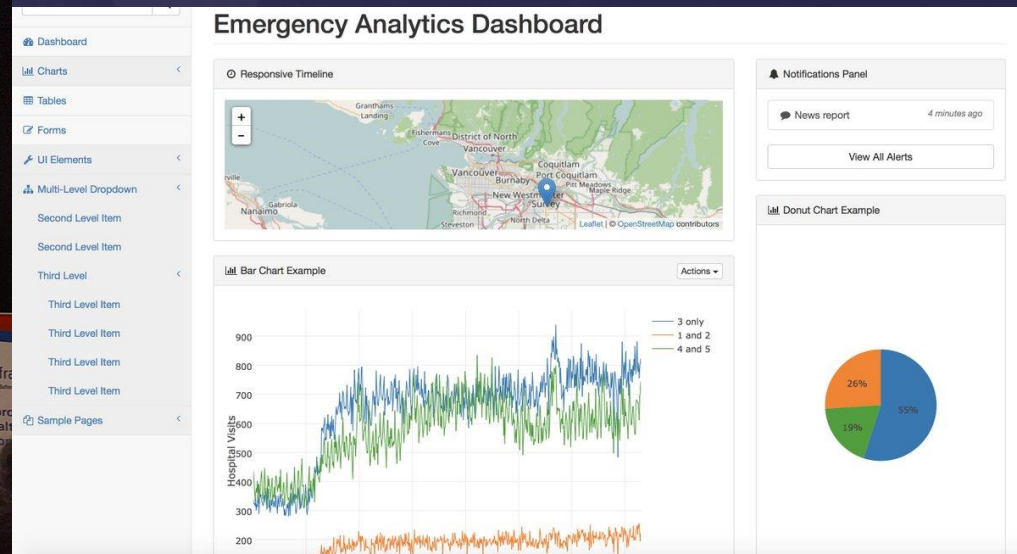

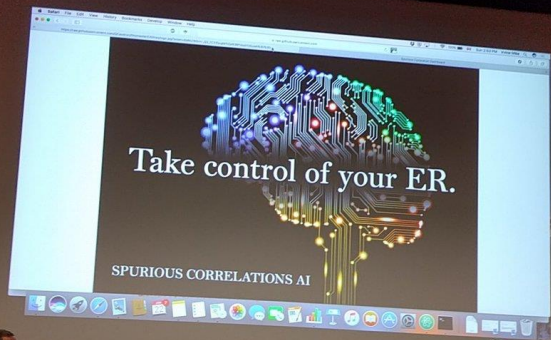

# Fraser Health Hackathon

**Spurious Correlations AI: Spurious Correlations** – A dashboard to take control of your ER by predicting ER visits; Finds a relationship between respiratory infection emergency room visits and changes in air quality, weather, and frequency of local Google trends of social media searches, which are visualized as an interactive map.

This model, which can be used for other types of illnesses, can forecast when spikes in emergency visits are likely to occur, allowing for better resource and staff planning, and helping identify where health care services can be delivered outside the hospital

Decision Makers

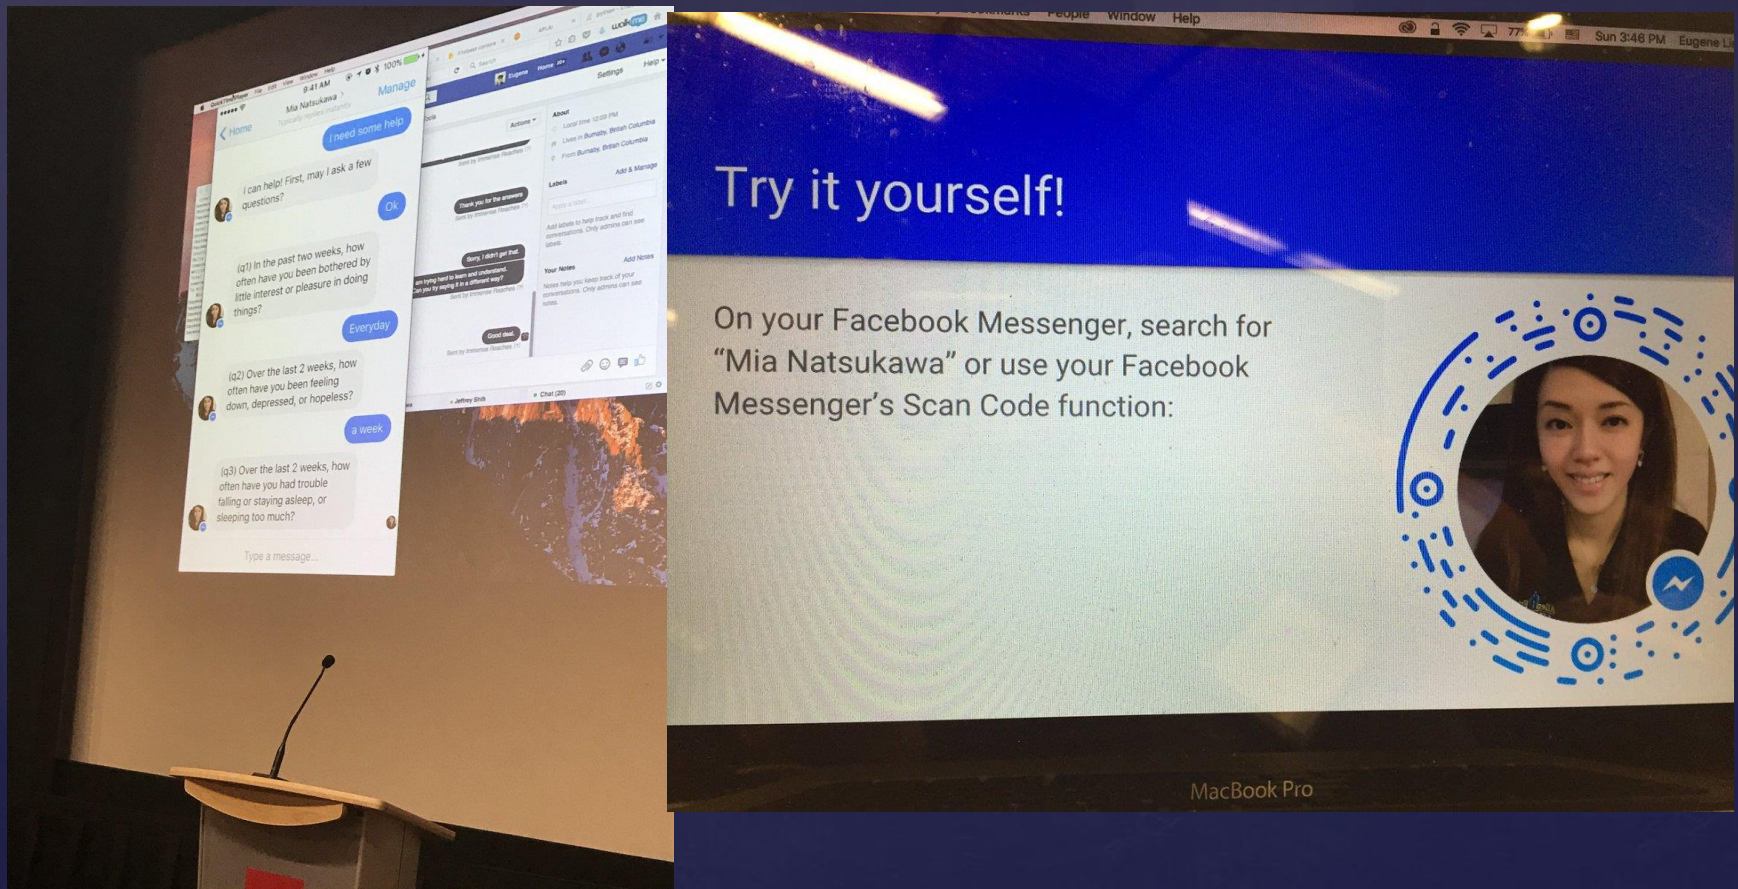

# Fraser Health Hackathon

**Dr. Bill:** **Health Pass** – Patient Owned medical records; a portable e-health record that connects patient's device with health care provider's systems **Patient Centered Service**

# Fraser Health Hackathon

**Team Baymax:** **Chatbox for Depression Screening** - A chatbot for depression screening via PHQ-9 (Patient Health Questionnaire for depression), while keeping an upbeat and pleasant conversation to bring some sunshine. **Mental Health and Substance Use**

# Fraser Health Hackathon

**Locumunity:** **Locumunity** - Locum Job Matching Tool; An active online matching tool to match locums to physicians/clinics and available jobs. **X-Factor**

# Fraser Health Hackathon

**Extreme Gradient Wusting:** **Drug Overdose Analytics Platform** - Web-based application designed to visualize where overdoses tend to happen at given times of day, and days of week. Web platform showing overdose data with interactive maps and graphs.

Overdose Analytics

# Fraser Health Hackathon

**Spectrum** : **Naloxone Take-Home App** - iOS, Android & Web app to help people identify and recognize an overdose, provide a step by step guide to respond and treat with naloxone kit & prevent overdoses. **Naloxone Take Home App**

# Fraser Health Hackathon

**TrackER: TrackED** – A web system that track patients, admissions and diagnosis. To enable ER professionals to realize the full power of their own data by providing Personalized Reports on their Patient's Outcomes. **Clinicians**

**LJN: Nalox App** - Provides educational resources and crowd sources first local response in an emergency. Sends notification to trained naloxone users with geo-location of an overdose. **Take Home Naloxone App**

**Genzo Consulting: ReferMeDoc** - Referral system to decrease patient wait time and provide optimal communication flow between GPs and Specialists. **E-scheduling of specialist resources**

## So Now What?

### Financing Cycle

- Find the right partner for your stage
- Smaller piece, but of a bigger pie

### What We Look For

- Strong management team (for stage)
- Differentiated product to your competition
- Funding for the next 9-12 months
- Investor "depth of wallet"
- Product development plan
- Plans to address any shortfalls (product, Mgmt, etc.)
- Roadmap to profitability

At the end of the day, it all comes down to  
Management's ability to execute
